Chroma Meter

KONICA MINOLTA CS-150/CS-160

New models with higher accuracy and comfort of use !

## High accuracy

The CS-150 and CS-160 are highly accurate tristimulus colorimeters equipped with newly designed sensors with spectral responses that more closely match the CIE 1931 color-matching functions representing the sensitivity of the human eye to provide measurement results that better correlate with visual evaluation.
*The $\bar{x}(\lambda)$ CIE 1931 color-matching function has two peaks, a small one in the short-wavelength region (often labeled $\bar{x}_{1}(\lambda)$ ) and a larger one in the long-wavelength region (often labeled $\bar{x}_{2}(\lambda)$. In conventional tristimulus colorimeters, the $\bar{x}(\lambda)$ sensor has a spectral response only for the long-wavelength region $\bar{x}_{2}(\lambda)$, and the
data for the shor-wavelength reion data tor the shor-wavelength region $\bar{x}_{1}(\lambda)$ is calculated from the $\bar{z}(\lambda)$ sensor. But the $C S$ - 150 and $C S$-160 have spectral responses that more closely follows the $C 1 E$
1931 color-matching functions, and directly measures using the $\overline{\bar{x}}(\lambda)$ response in both the short-wavelength region $\bar{x}_{1}(\lambda)$ and long-wavelength region $\bar{x}_{2}(\lambda)$, so the resulting instrument spectral response more closely matches the CIE 1931 color-matching functions for the human eye.

## Numerous optional accessories

-mount CCD camera adapter enables the viewfinder to be red from a distance.

This adapter allows an industria C-mount CCD camera to be attached to the viewfinder so that through the viewfinder can be monitored from a distance or *CCD camera not included.

Illuminance adapter

Corresponds to $1.5-9,999,000 \mathrm{IX}$ method does not conform to DIN or JIS standards.

Automatic mode automatically sets the measurement time according to the brightness of the target.

Backlit display is easy to read even in dark places, and is automatically switched off during measurements.

Bright viewfinder makes it easy to target desired areas of measurement subjects.

## Incredibly easy to use

## Easy-to-understa utility software

The included software allows the meters to be controlled from a PC. Repeated interval measurements can be conducted for a specified number of times at data cified intervals, measurement data can be
