

Situation:

For example, you need to find all the records and report all the cargos brought by Juozas Juozaitis from May 21, 2019.

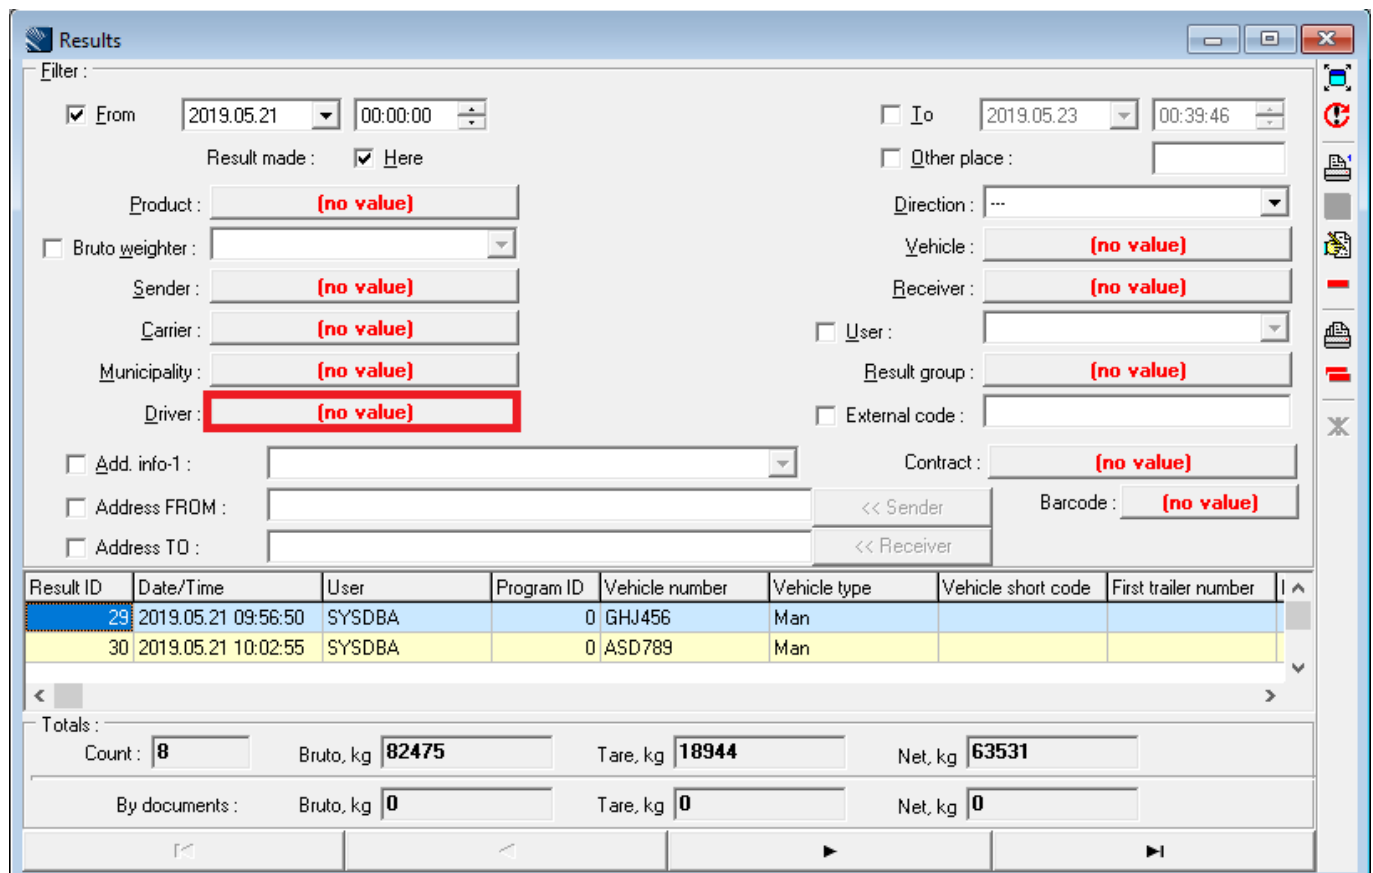

Step 1 - Open the table "Results".

In the menu above, press "History" to select "Results" from the drop-down list.

Step 2 - Choose to set up a driver filter.

Press "no value" next to "Driver".

By documents: Bruto, kg 0 Tare, kg 0 Net, kg 0

Step 5 - Updating the results list.

Press the second button on the right side bar. Review the updated results table.

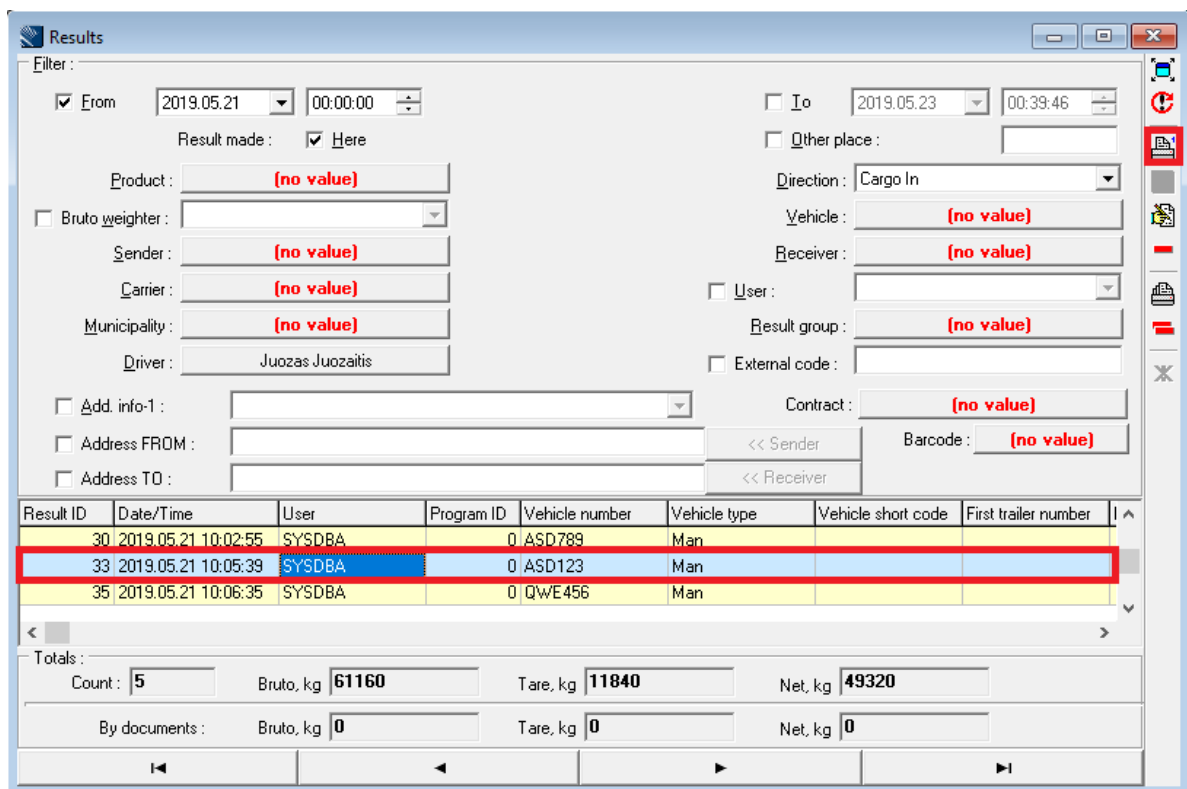

Result ID	Date/Time	User	Program ID	Vehicle number	Vehicle type	Vehicle short code	First trailer number
29	2019.05.21 09:56:50	SYSDBA	0	GHJ456	Man		
30	2019.05.21 10:02:55	SYSDBA	0	ASD789	Man		
33	2019.05.21 10:05:39	SYSDBA	0	ASD123	Man		

Totals:

Count:	5	Bruto, kg:	61160	Tare, kg:	11840	Net, kg:	49320
By documents:		Bruto, kg:	0	Tare, kg:	0	Net, kg:	0

Step 6 - Generate Report.

Select the record whose report will be generated and press the third button on the right side bar.

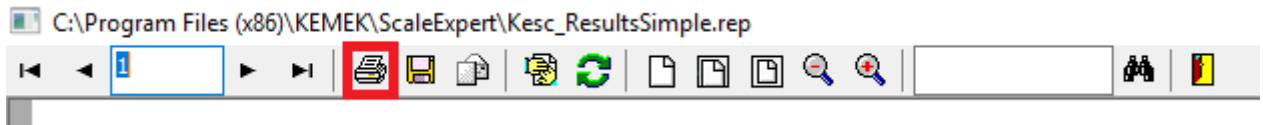

Result ID	Date/Time	User	Program ID	Vehicle number	Vehicle type	Vehicle short code	First trailer number
30	2019.05.21 10:02:55	SYSDBA	0	ASD789	Man		
33	2019.05.21 10:05:39	SYSDBA	0	ASD123	Man		
35	2019.05.21 10:06:35	SYSDBA	0	QWE456	Man		

Totals:

Count:	5	Bruto, kg:	61160	Tare, kg:	11840	Net, kg:	49320
By documents:		Bruto, kg:	0	Tare, kg:	0	Net, kg:	0

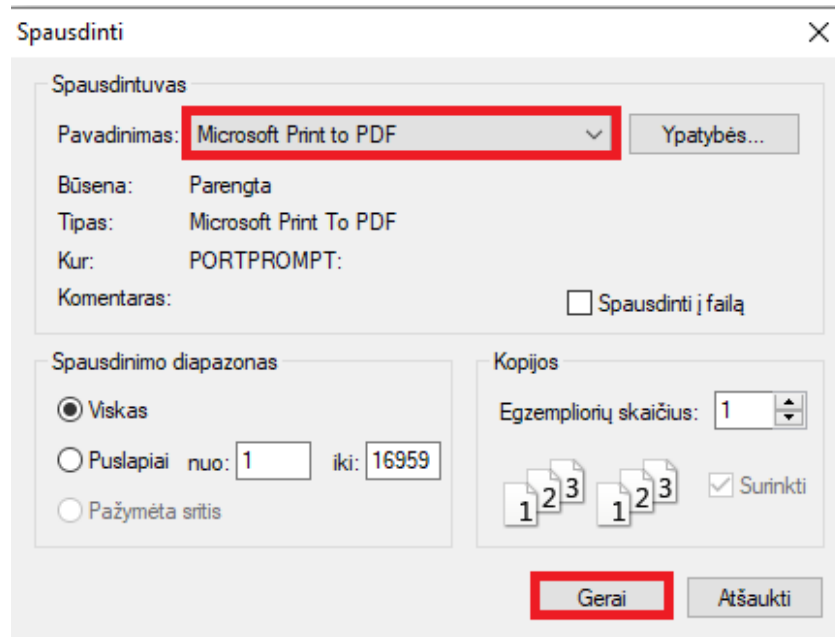

Step 7 - Prints selected record report.

In the report window click on the printer icon on the control bar.

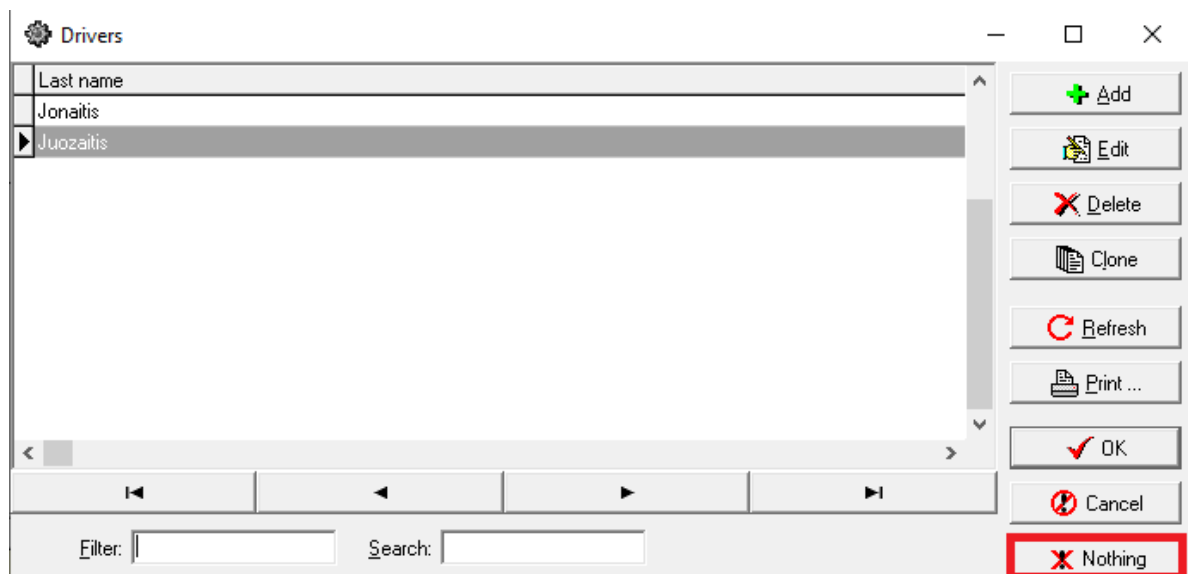

Step 8 - Set up the printer.

In the newly opened window, we select the printer by name and press the OK button.

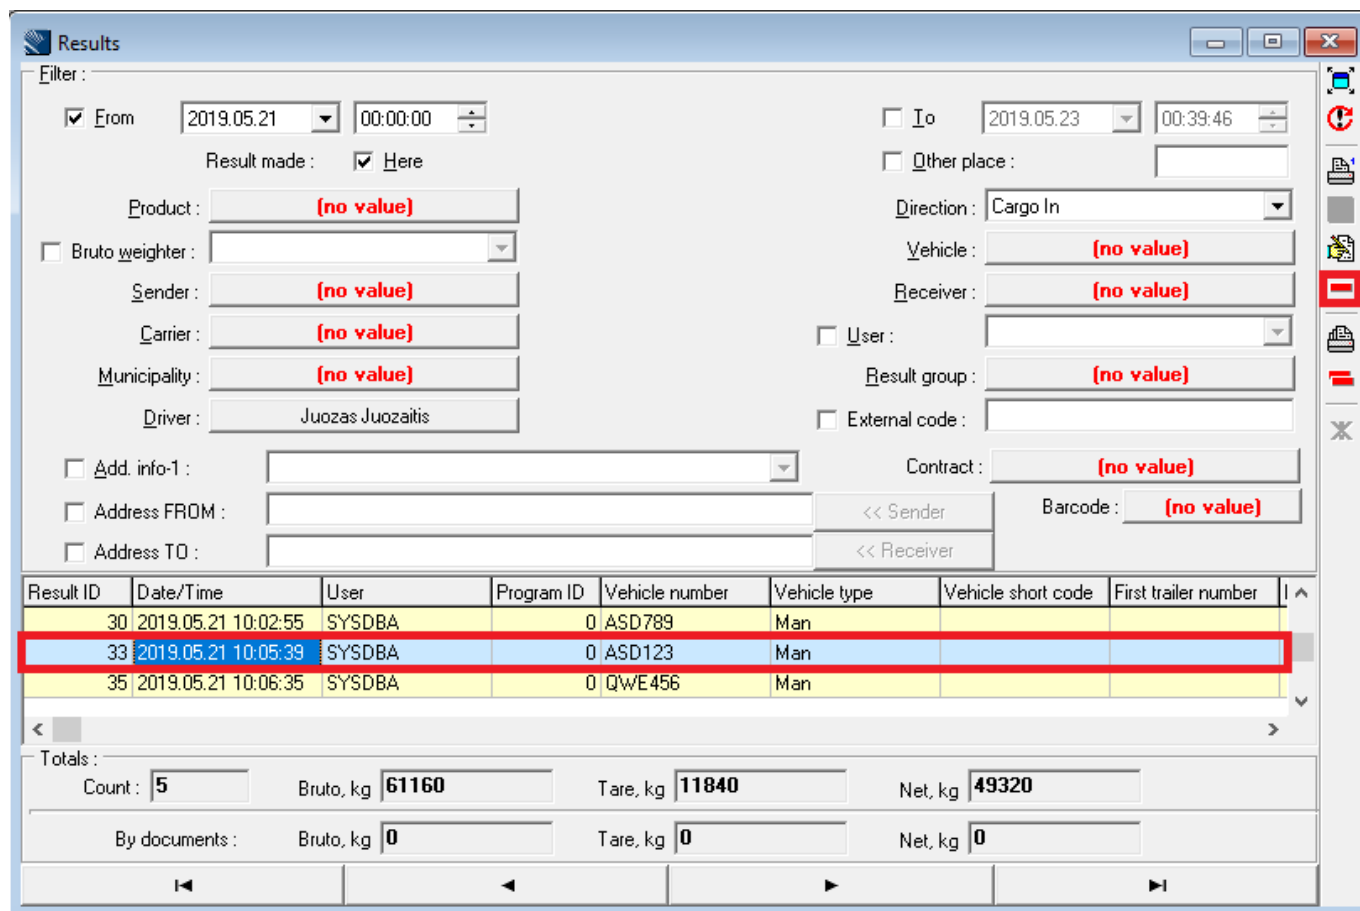

Step 9 - Restoring Filters.

Select the filter in the same way as in the second step, then press "Nothing". It is important to update the list as it was done in step five.

Step 10 - Delete selected result.

Pick an item that you want to remove and press in the fourth icon on the right side bar.
